#### WEALTH FOR WEALTH'S SAKE.

English Writer Has Sounded a Warning Against the Domination of Mammon.

Look about you, and sooner or later you will see some man to whom the idea of wealth, as wealth, does not appeal. I advise you to watch this man closely for he will presently demonstrate to you that money dominates everybody except the man who does everybody except the man most that wished to convey.

man on your farm, in your village, or "What is the trouble?" asked the in your legislature. But be sure that whenever or wherever you meet him, as soon as it comes to a direct issue between you his little finger will be thicker than your loins. You will go in fear of him; he will not go in fear of you. You will do what he wants; he will not de what you want. You will find that you have no weapon in your armory with which you can attack him; no argument with which you can appeal to him. Whatever you gain, he will gain more. would like you better to be that much imight be called sloppy."

#### NATURES LAWS CONSTRUCTED BY MAN.

By Charles R. Gibson, One-sometimes finds people who consider theory to be a useless sort of thing, a sort of wild guess, without which we should be none the poorer. It must be clear that a theory is more than a mere speculation. If I suggest that the moon is made of green cheese my speculation is not entitled to be called a theory. I cannot bring forward any observed facts to support my suggestion.

There is a good story told of a well known professor

examining three raw students. He asked the first "Does the earth go round the sun or the sun go round the earth?"

"The earth goes round the sun, sir."

"You," said the professor, quickly turning to the cond student.

"O, the sun goes round the earth." demanded the professor of the third student.

"O, it's sometimes the one way and sometimes the Our position then is this: We gather a number of

carefully observed facts and we then try to explain them. We then look out for new facts and see if our theory can explain these also. If it cannot we must be willing to alter our theory.

When we are quite satisfied that a theory is correct then raise the theory to a higher platform and call it a law of nature. It is well to remember that with all other knowledge these laws of nature are of man's own making. It is amusing how some people think that things happen because of these "laws of nature." As if the universe were controlled by these laws which man has constructed! The laws of nature ure only theories which seem to be correct not facts, but merely our views or ideas of facts.

#### FEMININE BEAUTY AS NOW INTERPRETED.

By Marcel Prevost Mrs. Howard Gould testified recently to the

effect that a truly elegant woman ought not rear the same gown twice, no matter how beautiful or expensive a gown it may be. The tendency towards almost inconceivable extravagance in dress is not surprising in view of the fact that society lays so much stress upon appearance rather than upon accomplishments. One of our first ultra-modern principles is that woman's attraction resides not so much in her spiritual and intellectual qualities, not in her beauty, but in her elegance. And by ele not meant the politeness and the harmony of her bearing and manners; but simply the way in which she 'appears," the manner in which she is dressed ...

To be beautiful in our day and age no longer means ternal inherent. God given but an external thing dependent upon the purse; the tailor, and the milliner.

The artists who devote their lives to making new fashions and styles for the healtiful sex are racking their brains now to make up gowns for which they are to charge \$500, or hats for \$300. They do not plan sons and the co-operation of its various constituent such high priced gowns because of their own great cu-vparts exert an influence for good not only as to its own

They demand it because of the competition with which they meet from their sisters who are not as rich as themselves. They don't want these to equal them in splendor and in elegance.

Those who will hold out longest in this mad chase will some day awaken to the fact that in spite of all their resplendent gowns they are not really elegant women, but imitations and no more. And then they will take their money, which they now waste on simos inconceivable luxuries to adorn themselves outwardly, and will spend it in travel and in other things which will enrich their intellect, and will make them more attractive as women and not mere lay figures.

#### TRAMPS AND BUMS ARE DISTINCT CLASSES.

By Terence V. Powderly. There is a big difference between the man who is out of a job and cannot find one and the man who never had a job and would not take one if he could get it. A tramp is a man willing to work, but forced to go from place "to place in search of it. A bum is a sot; a-loafer-and-a-drone-who-goes into hysteria at the mention of the word work. A hobo is an individual who goes on the theory

that the world owes him a living and he is going to get, it by hook or crook. The honest workingman need take no offense at the criticism of the tramp class. The hobo or bum never worked and never will. He is the fellow whose motto is, "The world owes me a living." honest workingman knows that the world doesn't owe him a living unless he earns it.

The solution of the unemployed problem in the big cities is in the transportation of men who want to work to places where men are wanted for work. There is a crying demand for labor in this country. In the fields of the west and along the roads of the west there is a constant cry for more men. In Chicago, New York and the other large cities there are thousands of good, hardworking men who could-fill this need if they had the The trouble is they haven't the money to get to the field of employment.

#### EAST MUST NOT DOMINATE THE WEST.

By Gov. John A. Johnson.

It is time that the West threw off the shackles of the East. We as an integral part of the American people should cast our influence and our votes not only to advance the material interests of our own particular section, but we should be broad enough and big enough to labor for the common-good-of-our common country.

SUFFERING AND GLORY.

By Rev. Walter Whitten, Ph.D. "I reckon that the sufferings of this present time are not worthy to be compared with the glory which shall revealed in us."-Romans 8: 18.

Upon reading these words, we are apt to form the conclusion that St. Paul here places in vivid contrast the sorrows of time with the glories of eternity. Probably this obvious meaning is included. But this is surely not all, nor, indeed, the chief assurance of the text. There is a deeper and more blessed meaning, one which should find a practical exposition in our daily life as Christians, and which doubtless St. Paul realized in his own heart and life. Here is expressed the promise and assurance of a glorious hope. He expresses the which each one of us should hold with all our hearts-that the suffer-ings and troubles of this present time are not worthy to be compared with the glory which shall be revealed in

"the glory which shall be re-By cluded the "crown of glory which fadeth not away," and which will be the Governor of Colorado when it was still portion of God's saints and martyrs a territory and a Major General in the in eternity. We shall be kept by the God, and "the sufferings of this present time"—the sorrow of bereavemen the wear and tear of anxiety and tro ble, the frets and trials of daily life will not overwhelm nor crush over and above all, the peace of God will rest upon us, and the glory, as of a brilliant sunset after a day of storm, will fill our souls with joy and bright

And as this is the case in time

much more is it so in eternity, when we shall receive our reward, even "a glory; which fadeth away." Then we shall realize, as St. told the Corinthians, that "our, light affliction, which is but for a mo-ment, worketh for us a far more exceeding and eternal weight of glory. Let nothing dim our faith nor deatroy our confidence in our Father's love. If our hope is kindled and kept alive by the love of Christ, even when we are passing through the darkest epths of suffering and affliction, we

shall not give in, but shall bravely bear on to the end, assured that our present discipline and trial will result in blessing to ourselves, and in the honor and glory of God, and that His glory will be revealed and made manifest in us.

It is our greatest privilege, as Christians, journeying through this earthly pilgrimage, wearled with the march of life, that we have a Friend who never faileth us-that, in the blackest night of sorrow and doubt, we have the comfort and strength of the love of God around us, and the hand of Christ within our own, so that the weakest and 'ffailest follower of the cross can exclaim with St. Paul, am persuaded that neither death, nor life, nor angels, nor principalities, no powers, nor things present, nor things to come, nor height, nor depth, nor any other creature, shall be able to separate us from the love of God, which is in Christ Jesus our Lord."

ROCK OF AGES. By Augustus M. Toplady.

only as the author of "the most popular
hymn in the English tongue," was celebrated in his own time as a religious
controvertist, Strange to say; this universal hymn was written to oppose the
doctrines taught by Wesley, and it originally formed the curious closing argument of an elaborate theological article,
entitled "The National Debt, published
in the Gospel-Magazine, Yet it is by dartion most popular of all Cheistian hymnsholding first place in nearly every list that

Mr. Gladstone translated it into Lattin, Greek, and Italian, it is said that the brave. Gen. Stuart, wounded before Theimond, deld with this hymn on his lips, and the same is related of the prince consort of England. When the London went down in the Bay of Riscay in 1866 the last thing heard by the survivors was the passengers singing "lick of Aree." Many Campes have crept into this hymn, but the following periods.

Let me hide myself in thee; Let the water and the blood, From thy wounded side that flowed. Be or sin the double cure; leanse me from its guilt and power,

If any woman who is suffering with any ailment peculiar to her sex will ask her neighbors this question, she will be surprised at the result. There is hardly a community in this country where women cannot be found who have been restored to health by this famous old remedy made exclusively from a simple formula of roots and herbs.

During the past 30 years we have published thousands of letters from these grateful women who have been cured by Lydia E. Pinkham's Vegetable Compound, and never in all that time have we published a testimonial without the writer's special permission. Never have we knowingly published a testimonial that was not truthful and genuine. Here is one just received a few days ago. If anyone doubts that this is a true and honest statement of a woman's experience with Lydia E. Pinkham's Vegetable Compound write and ask her.

Houston, Texas.—"When I first began taking Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had been sick for three years with female troubles, chronic dyspepsia, and a liver trouble. I had tried several doctor's medicines, but nothing did me any good.

"For three years I lived on medicines and thought I would never get well, when I read an advertisment of Lydia E. Pink-ham's Vegetable Compound, and was advised to try it.

"My husband got me one bottle of the Compound, and it did me so much good I continued its use. I am now a well woman and enjoy the best of health.

"I advise all women suffering from such troubles to give Lydia E. Pinkham's Vegetable Compound a trial. They won't regret it, for it will surely cure you."—Mrs. Bessie L. Hicks, \$10 Cleveland St., Houston.

VICTORY ON APRIL 6, 1909

America's Savants Applaud the Feat Accomplished After That of Dr. Cook.

Scarcely had the world begun to accustom itself to the news that Dr. Cook had discovered the north pole when it was startled by the telegraphic announcement that Peary, the vet eran arctic explorer; had accomplished the same feat. Pearv's message doubt less was sent in ignorance of the fact that Cook had reported his discovery A little message of seven words

flashed by wireless from the coast of Labrador to the New York news bureaus at noon Monday made Com-mander Robert E. Peary, the second American citizen within five days to report to an astounded world the discovery of the North Pole. Later advices showed that Commander Peary had reached the bole on April 6, 1909, one year, lacking fifteen days, after Dr. Frederick A. Cook had achieved

From St. Johns, N. F. came the an nouncement that Peary had telegraph ed the Governor of New Foundland by reless from Labrador stating that he had reached the pole and congratu-lating New Foundland on its part in the discovery, because of the fact that the captain and the crew of Peary's ship were New Foundlanders.

#### Sure of One White Witness.

One-of-the-most significant dispate es as bearing on any possible future controversy over the honors of discovery was that received in Freeport, Me. at 3 o'clock Monday afternoon by Mrs. W. C. Fogg from her brother B. D. McMillau, an instructor in Worcester Academy, who accompanied Peary on his trip. The message shows confirm his claims. McMillar wired:
